

Dear Sirs,

regarding your inquiry **EC directive REACH** ([EC 1907/2006](#)), we would like to give you the following information.

REACH is a European Community Regulation on chemicals and their safe use.

It deals with the **Registration, Evaluation, Authorisation and Restriction of Chemical** substances. We are aware of REACH and its potential effects. As a downstream user we are not responsible for a substance (pre-) registration.

We are in constant contact with our raw material suppliers and ask them regarding the registration for their substances, which we use for our preparations.

Polymers are not under REACH regulation and the monomer substance(s) or other substance(s) in the polymers will be (pre-) registered by our raw material suppliers or monomer manufacturers.

In addition, we are obliged to disclose information about the constituents of our products (according to Article 33 of the REACH Regulation (EC No. 1907/2006.).

We confirm that our products (except for specified below) do not contain any of the substances listed in the Candidate List of Substances of Very High Concern, latest release on 20.06.2016 by ECHA, in the relevant concentration of >0.1% (w/w).

Product PVC-U contain more than 0.1% of the following substance: Dioctyltin derivates (DOTE), CAS number: 15571-58-1.

There are no special precautions required in handling the item because the substance is firmly embedded in the plastic and will not be released under normal conditions of use.

Our primary goal is to continue our service to our clients and to provide you with the products you need.

More information about REACH can be obtained at [www.echa.europa.eu](http://www.echa.europa.eu)

GEHR GmbH
